Bath Elementary Earns State STEM/STEAM Designation

(May 27, 2020) – Bath Elementary School is one of only ten schools in Ohio to receive the state’s STEM/STEAM School Designation for 2020.

The Ohio STEM committee approved applications for schools that implement best practices in STEM and STEAM education, following a rigorous application process with the Ohio STEM Learning Network (OSLN).

The designation recognizes a school as an effective place for STEM or STEAM learning. The schools that received the designation were commended for exhibiting a strong culture of STEM learning, use of problem-solving learning, professional development for teachers and staff, and a robust STEM curriculum.

“We are beyond thrilled to be recognized for our outstanding STEM curriculum,” said Dr. Matthew Montgomery, Superintendent at Revere Local Schools. “Revere understands a STEM education is valuable for all students, as they develop and build critical thinking skills for their future careers.”

About the Process

This year’s designation process began with a series of pre-application webinars for potential applicants, organized by OSLN and the Ohio Department of Education. Both organizations heard from applying schools through a series of in-person and online site visits. Finally, each school’s application received a recommendation from the network and was put forward to the Ohio STEM Committee for review.
