

PaySchools Central makes school payments quick and simple.

By putting the power back in the hands of parents, registration and payments are easy and accurate. Parents never have to worry about their children running out of lunch money thanks to greater control over how and when to pay.

What does this mean for your district? Fewer phone calls to your support staff because the system gives parents greater control over payment options, meal restrictions, site navigation, and password recovery – and a Help Portal that can assist users with most issues.
